ITQ

WE ARE LOOKING FOR:

SYSTEMADMINISTRATOR (W/M/D)

ABOUT US

As an independent service company, we have stood for software and systems engineering and digital training for more than 20 years. We support companies in the field of mechanical and plant engineering to improve the quality of software components and to optimize development processes. We offer you a secure job in an international company shaped by its people. You can look forward to having nice colleagues, flat hierarchies, and the opportunity to actively help shape the company. Become part of our dedicated team!

WHAT WE EXPECT FROM YOU:

Our IT is the engine of our company. With 150 client devices and 40 server services in operation, we ensure that our consultants have access to an outstanding technical infrastructure anywhere in Europe and at any time. As in any engine room, we have to maintain the equipment regularly and to upgrade it occasionall Quality-oriented action. This includes:

- Ensuring the operation of the server infrastructure/clients
- Administration of our network
- Administration of the firewall with site-to-site and point-to-site
- VPN Administration of our cloud resources on AWS and Azure
- Support in IoT projects
- Backup administration with TrueNAS
- Maintenance and procurement of hardware

WHAT WE OFFER YOU:

We offer you the opportunity to get involved in a young and highly motivated team. Trust and flexibility on both sides are our top priorities. For us, humour and fun at work are just as important as keeping a cool head in stressful situations and dealing with deadlines. We care about:

- Respect and trust in the team
- Flat hierarchies and friendly cooperation
- Flexible working hours and home office days
- Varied working environment
- Individual development opportunities
- Regular team events
- Good transport links and parking space

Are you curious? We look forward to receiving your application!
